

School			
Major	Bachelor of Business Administration in Accounting Information Systems		
Core Requirements			
Code	Title	Credits	Description
BACC200	Financial Accounting	3	The course introduces the basic framework of accounting; it covers the basics of financial accounting from the accounting cycle through the presentation of financial statements. The course prepares the students to be capable of performing the different steps of the accounting cycle for service and merchandising businesses.
BACC360	Managerial Accounting	3	The course tackles the managerial use of accounting data to plan and control personnel and operations within a firm. Students will understand how accounting systems can provide information and data for managerial decision-making and influence management decisions. Students will master accounting analysis and will learn how to approach business problems from a management perspective. This course covers basic cost accounting and managerial accounting concepts. Topics include the distinction between financial accounting, managerial accounting and cost accounting, basic cost concepts, cost-volume-profit analysis, incremental analysis and decision-making, pricing, and budgeting.
BECO210	Introduction to Microeconomics	3	This course is designed to introduce students to the basic methods and techniques that allow the micro units to make a proper choice, given scarcity. In this course, students are expected to learn how to calculate opportunity costs, determine comparative advantage, understand the theory of demand and supply, calculate equilibrium price and quantity, relate elasticity to total revenue, decide on the bundle of goods that maximizes consumer's total utility, determine several costs and differentiate between two extreme markets: perfect competition and monopoly.
BECO260	Introduction to Macroeconomics	3	This course is designed to provide students with the foundations for understanding key economic indicators influencing the behavior of the economy as a whole. In this course students learn to calculate the nation's output (GDP), the unemployment rate and the price level, understand the Classical and the Keynesian models and analyze the effects of fiscal and monetary policies.
BFIN300	Business Finance	3	The course focuses on the principles of finance and their application in business corporations, with the main objective of maximizing shareholders' wealth. Topics include discounted cash flow analysis, the various uses of funds, valuation models, management of working capital, cost of capital, capital budgeting, long term financing and dividend policy.
BMGT200	Introduction to Business Management	3	The course focuses on how organizations operate in an era of rapid change, and the factors which determine how managers can operate effectively. Topics include the management function; the genesis of modern management; the development of management theory; the context in which managers operate; and managing organizations. The course integrates classical and modern concepts with a rich collection of contemporary real-world examples and cases. The course covers six major themes that guide the progress through the fascinating world of management, namely: Change, Skill development, Global economy, the Internet revolution, Diversity, and Ethics.

BMGT300	Introduction to Business Law	3	The course provides an in-depth conceptual and functional analysis and application of legal principles relevant to the conduct and understanding of commercial business transactions. Topics include the legal, ethical, and social environment of business; agencies, partnerships, and other forms of business organizations; and contracts and sales agreements. Relevant Lebanese laws and Salient legal aspects of international business are also discussed. Assignments may include conducting relevant research using computer databases and networks as well as other methods for accessing information.
BMGT315	Human Resource Management	3	The course examines the role of the human resource manager in both public and private sector organizations. Topics include personnel planning, selection, appraisal, training and development, compensation, and international aspects. The course is rich with practical case studies, and complemented with research assignments in the field of human resource management.
BMGT340	Organizational Behavior	3	This course allows the students to study the behavior of individuals and groups as part of the social and technical system in the workplace. They examine individual and group behavior, communication, conflict and various management styles, motivational techniques and coordination in the work environment and apply these concepts to the development of an organization's human resources. Organizational behavior (OB) highlights the significance of challenges and opportunities of OB, perception, attribution, learning, organizational change, organizational culture, engagement, leadership, and conflict management.
BMGT380	Business Ethics	3	The course focuses on the relationship of business ethics and social responsibility in both domestic and global settings. It explores the ethical and moral considerations of corporate conduct, social responsibilities, policies, and strategies, and emphasizes on the definition, scope, application, and analysis of ethical values as they relate to issues of public consequence in both the domestic and global environments. Special attention is given to moral problems such as the ethics of hiring and firing, bribery, and professional responsibility to society.
BMIS300	Management Information Systems	3	The course provides an overview of Management Information Systems (MIS) within a business context with an emphasis on end-user computing. It covers MIS theory and practice as they relate to management and organization theories, current trends in MIS, managerial usage of information systems, and computer hardware, software, and telecommunications. It also provides experiential learning through exposure to various decision-support tools.
BMGT360	Research Methods for Business	3	Research projects are immensely required by the vast majority of business analysts, managers, and other professionals to ensure optimal decision-making. From that perspective, analysts and key decision makers should possess necessary knowledge with regards to business research and its methodologies. This course discloses the importance of research in business and its contribution towards professional decision-making. It introduces students to the main required concepts in conducting research, covering all needed principal stages, essential terminologies, processes and methodologies that are vital in reporting and explaining the research-findings.
BMIS360	Operations Management	3	Operations is an exciting area of management that has a profound effect on productivity. The goal of this course is to present students with a broad introduction to the field of operations in a realistic, practical, and applied manner. The course topics include operations and productivity, project management, forecasting, and location strategies.

BMKT300	Marketing Theory and Principles	3	The course introduces the concepts and principles of marketing, including the marketing of service and nonprofit organizations. Topics cover the marketing concepts, including relationship marketing, product development, pricing, promotion, marketing research, consumer behavior, international marketing, distribution, and internal marketing to employees. Practical case studies and research work constitute an integral part of the learning methodology.
IMGT490	Global Strategic Management	3	Business Policies and Strategic Management is intended to be a challenging and integrative capstone course for the undergraduate business school curriculum. The course stresses the theme that a company achieves competitive advantage and experiences higher performance if its managers have a timely strategic game plan and implement it proficiently. While learning how to manage strategy, you will also be required to integrate the body of knowledge that you have assimilated in the business curriculum. The purpose of this integration is to enable you to develop a 'macro' or big picture perspective. Most of the business courses that you have taken so far have focused on a specific functional area, e.g. HRM, marketing, finance, etc., and/or have discussed a specific body of knowledge, e.g. economics, statistics, etc. This course is different from your previous courses. The issues dealt with by a manager during the process of strategy formulation and implementations are multifunctional and involve a dynamic array of variables. As a result, you will need to take a total enterprise perspective in assessing the pros and cons of a company's strategy.

Major Requirements			
Code	Title	Credits	Description
BACC330	Intermediate Financial Accounting I	3	The course includes discussions of the conceptual framework of financial accounting including its principles, assumptions, and constraints. Emphasis is placed on the recording procedures in the corporations, in addition to the reporting of Income Statement and Balance Sheet. Also, it focuses on reporting of cash and its equivalents, receivables, current liabilities, and other special accounting topics.
BACC370	Intermediate Financial Accounting II	3	The course is a continuation of the study of financial accounting with a concentration on the reporting of the stockholders' equity accounts of the Balance Sheet and the preparation and analysis of the Statement of Cash Flows. The course includes the study of the accounting for inventory, fixed assets, and long-term liabilities. Also, the course provides information relating to revenue recognition.
BACC400	Accounting Information Systems and Applications	3	The course examines system design concepts and methods including an understanding of basic control structures. Covers specific accounting cycles and computerized transaction processing systems. Analyzed controls for manual and computerized systems including database systems.
BACC420	Tax Accounting	3	This course is primarily designed to provide the students with a fundamental understanding of federal income taxation and income tax concepts of business entities and individuals. Topics will include the income sources, income exclusions, the requirements for various tax deductions, and business expenses.
BACC430	Auditing and Fraud Prevention	3	The course is a study of external, governmental and internal auditing, professional ethics, other attestation standards and specific companies and industries. It includes financial, operational and compliance auditing and audit risk assessments and techniques.

BACC380	Advanced Managerial Accounting	3	Problem-solving for managerial accounting-related issues will be a major focus of the advanced managerial accounting course. Students will get prepared for the role accountants play in the organization's planning and management. Students will acquire knowledge about and gain proficiency in effective strategies for decision-making analysis using cost data and economic insight. Furthermore, students will develop effective ways to communicate results and retain ethical codes. Topics include the distinction between financial accounting and managerial accounting, job order costing, process costing, activity-based costing, standard costs and balanced scorecards, and financial statement analysis.
BACC497	Advanced Accounting	3	The course mainly discusses the consolidation procedures including proper assignment, depreciation, and amortization of any difference between cost and book values and non-controlling interest disclosures. The student will be able to properly prepare consolidated financial statements and demonstrate an understanding of current GAAP related to business combinations and its relationship to present reporting practices. Also the student will prepare and analyze accounts for importing and exporting transactions denominated in foreign currencies, as well as accounting for forward exchange contracts. Topics include Business combinations, equity method, cost method, consolidation of financial statement at date of acquisition and foreign currency transactions

General Education Requirements			
Code	Title	Credits	Description
ARAB200	Arabic Language and Literature	3	This course is a comprehensive review of Arabic Grammar, Syntax, major literature and poetry styles, formal and business letters.
BMTH210	Business and Managerial Math	3	This course is designed to provide students with basic math skills useful in solving economics and business real-life problems. In this course, students learn to calculate the slope of a linear function, graph and solve non-linear functions, calculate arithmetic and geometric sequences and series, perform several operations including differentiation, partial derivatives, integration, and solve differential equations and matrices.
BSTA205	Introduction to Business Statistics	3	This course is designed to provide students with an introductory survey of many applications of descriptive statistics. In this course, students are expected to classify and graphically present data among different measurement levels. They are also expected to calculate measures of location and dispersion, understand the basic probability concepts, and examine discrete and continuous probability distributions.
CSCI200	Introduction to Computers	3	The course aims at making students competent in computer-related skills. It is supposed to develop basic computer knowledge by providing an overview of the computer hardware and basic components as well as hands-on practice on common software applications such as Word, Excel, Power Point, Internet and Email. The student will learn how to use the new features of Microsoft Office 2010 mainly Word documents, Excel spreadsheets and PowerPoint presentations. On the surface, MS Office 2010 looks a lot different than previous versions (no more menus__toolbars!), but by learning to understand the dramatically changed, Ribbon-based interface, you'll quickly get back on the road to productivity.
CULT200	Introduction to Arab - Islamic Civilization	3	The purpose of this course is to acquaint students with the history and achievements of the Islamic civilization. Themes will include patterns of the political and spiritual leadership; cultural, artistic, and intellectual accomplishments Prerequisites: ENGL051, ENGL101, ENGL151.
ENGL201	Composition and Research Skills	3	This course focuses on the development of writing skills appropriate to specific academic and professional purposes; the analysis and practice of various methods of organization and rhetorical patterns used in formal expository and persuasive writing; the refinement of critical reading strategies and library research techniques; and the completion of an academically acceptable library research paper. Prerequisites: ENGL150, ENGL151.

ENGL251	Communication Skills	3	The objectives of this course are to improve students' writing skills for academic purposes by developing effective use of grammatical structures; analytical and critical reading skills; a sensitivity to rhetorical situation, style, and level of diction in academic reading and writing; and competence in using various methods of organization used in formal writing.
